# What's Out There?

by Ryannen S.

Earth is one amazing place, but our Earth isn't the only thing in the universe. The most popular saying about space is, "What's out there?" Gathered below are some amazing facts about space. The facts about space were gathered from Google.

## Amazing Facts

- If you put Saturn in a bathtub, it would float.
- There is a planet out there bigger than earth made out of diamonds.
- The largest star in the universe is being eaten by a black hole.
- A single day on Venus is longer than a year on Earth.
- There is a star that is only 20 degrees celsius.
- There is a star 1,500 times the size of our sun.

Well, that's it, humans!

#1 Joe Montana	#2 Babe Ruth	#3 Wayne Gretzky	#4 Jerry Rice
#5 Bobby Orr	#6 Jim Brown	#7 Gordie Howe	#8 Walter Payton
